

Sedge

Scientific Group: *Carex*

Habitat: Wet, damp places

Height: varies from 12" - 45"

Flowering time: varies from May -September

Abiotic things this plant needs:

Soil Moisture- Wet

Sunlight- Sunny

- Rocks
- Leaves
- Wood Chips
- Bare Ground

Biotic things this plant needs:

Decomposers- Yes

Spiders- No

Insects- Yes

Plants- Yes

Flowers

Scientific Group: *Forb*

Habitat: Dry to damp places

Height: varies from 8" - 100"

Flowering time: varies from April-October

Abiotic things this plant needs:

Soil Moisture- Dry
Sunlight- Sunny or Shade

- Rocks
- Leaves
- Wood Chips
- Bare Ground

Biotic things this plant needs:

Decomposers- Yes
Spiders- Yes
Insects- Yes
Plants- No

Rush

Scientific Group: *Juncaceae*

Habitat: Wet places

Height: 1-3 feet

Flowering Time: June-August

Abiotic things this plant needs:

Soil Moisture- Wet
Sunlight- Sunny

- Rocks
- Leaves
- Wood Chips
- Bare Ground

Biotic things this plant needs:

Decomposers- Yes
Spiders- Yes
Insects- Yes
Plants- Yes

Grass

Scientific Group: *Poaceae / Gramineae*

Habitat: Dry to damp places

Height: varies 12" - 48"

Flowering time: September -October

Abiotic things this plant needs:

Soil Moisture-

Dry

Sunlight-

Sunny or Shade

Rocks

Leaves

Wood Chips

Bare Ground

Biotic things this plant needs:

Decomposers-

Yes

Spiders-

Yes

Insects-

No

Plants-

Yes
