

Series Style Programs

Are you looking to enhance your program line up? ME4E now offers multi-day programs that you can schedule once a week or once a month. All programs have hands-on activities that will inspire youth to learn more. We will even promote books from your library that can assist in this process. Cost is only \$40 per hour with a 25% discount for programs limited to less than 16 participants.

Nature Thought of It First

Velcro, barbed wire, section cups & submarines were all invented by nature. We will compare & contrast inventions and maybe even be inspired to create some "new" inventions of our own.
Great for ages 7 and up

Green Team Time

Actions speak louder than words. We will complete earth-friendly projects each class and the participants even get to help choose how they want to help the environment.
Great for ages 5 and up

TV Scientists

Sid the Science Kid, Ms. Frizzle & Bill Nye all have one thing in common. They are TV Scientists. We will follow their lead and recreate experiments and activities that children have seen on TV.
Great for ANY age group

Natural Changes

Explore looking at different aspects of nature and observe how things change over time. From seasons to life cycles, nature has a way of renewing itself.
Great for ages 5 and up

Taking a Closer Look

Get up close and personal with nature. We will use a digital microscope, hand lenses, binoculars or spotting scope during each program. Photos will be sent via email after each class to help participants share their experience with others.
Great for ANY age group

Citizen Scientists

Regular people everyday help scientists collect data. Each class we will learn about a different local project and practice collecting information.
Great for ages 9 and up
